

SHREYA MESHARAM

Full-Stack Developer · Built 4 Live AI Products · Gemini Vision API · Claude API · React · Node.js
Nagpur, Maharashtra | meshramshreya28@gmail.com | [LinkedIn](#) | [GitHub](#) | [B.Tech CSE — GH Rasoni University \(2027\)](#)

WHAT I BRING TO THE TABLE

Full-Stack Developer who has built and shipped 4 live AI-powered products — not side projects, deployed apps with real users. I work across the full stack (React frontends to Node.js APIs) and integrate cutting-edge AI APIs including Gemini Vision API and Claude API. I also test everything I build: validating structured-output pipelines, catching RBAC permission-boundary failures, and eliminating defect escapes before any real user is affected. I write code that I can also break, which makes me unusually useful in early-stage teams.

LIVE PRODUCTS BUILT & TESTED

CodeCanvas AI — AI-Powered UI/UX Redesign Assistant · React, Node.js, Gemini Vision API 2025
codecanavs-ai-1.onrender.com

- ▶ Built a full-stack AI tool that accepts website screenshots or live URLs and uses Gemini Vision API to generate structured, professional-grade UI/UX improvement suggestions — deployed live on Render.
- ▶ Engineered the Gemini Vision API integration to process and analyze visual design inputs, producing actionable redesign recommendations across layout, typography, color, and accessibility dimensions.
- ▶ Designed and tested the dual-input pipeline (screenshot upload + live URL analysis) end-to-end — validated against 20+ real-world websites covering e-commerce, SaaS, and portfolio use cases before launch.
- ▶ Caught and resolved edge cases including unresponsive URLs, low-resolution screenshots, and ambiguous design contexts through systematic input-validation testing, ensuring clean output for all supported inputs.

ResumeBuddy — AI Resume Analyzer & ATS Scorer · HTML, CSS, JS, Claude API 2025
resumebuddy-3nc0.onrender.com

- ▶ Shipped an ATS scoring engine that processes uploaded resumes against a target role and returns structured JSON (score, skill gaps, suggestions) — validated against 50+ resume/role combinations before release.
- ▶ Caught and fixed 8 critical malformed-JSON edge cases (empty uploads, non-English content, missing role inputs) through systematic prompt testing, preventing production failures for all subsequent users.
- ▶ Performed cross-browser functional testing (Chrome, Firefox, mobile viewports) achieving consistent parity across all tested environments.

PromptCraft AI — Smart Prompt Generator · Node.js, Express.js, Gemini API 2025
promptcraft-ai-1-386o.onrender.com

- ▶ Built and tested an Express.js API that enhances user prompts via Google Gemini — verified correct status codes, response payloads, and timeout behaviour across all endpoint variants.
- ▶ Identified and eliminated inconsistent output quality for 3 distinct input types (vague, structured, domain-specific) by iterating on the prompt pipeline, improving output relevance measurably.
- ▶ Conducted UI usability testing on the one-click copy flow, logged 5 UI defects, verified all fixes — shipped a clean, defect-free release.

JobTidal — Placement Management Portal · React, Node.js, MySQL, Netlify Oct 2024 – Present
myjobtidal.netlify.app

- ▶ Designed and executed test cases for JWT authentication and RBAC across 3 roles (Student, Recruiter, Admin) — confirmed zero permission-boundary leaks across all API routes and UI views.

- Validated end-to-end workflows (job creation → one-click apply → status tracking → admin reporting) with MySQL-level data-integrity checks, catching 4 data-mismatch bugs before go-live.
- Authored API contracts and test documentation that cut onboarding time for new contributors.

TECHNICAL SKILLS

Testing	Manual Testing, API Testing (Postman + DevTools), Functional & Regression Testing, RBAC Validation, JSON Output Validation, Cross-Browser Testing, Edge Case Analysis, Defect Reporting
Languages	JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend	React.js, Tailwind CSS, Bootstrap 5, Responsive Design
Backend / API	Node.js, Express.js, RESTful API Design, Gemini API
Databases	MySQL (proficient), MongoDB (fundamentals)
Tools	Postman, Git, GitHub, VS Code,
Concepts	OOP, MVC, SDLC, Agile, Version Control, Technical Documentation

EDUCATION

B.Tech — Computer Science Engineering GH Rasoni University, Nagpur *Oct 2023 – Jun 2027 (Expected)*
 Relevant: Data Structures & Algorithms, DBMS, Operating Systems, Software Engineering, Web Technologies, Computer Networks

HSC — Science (PCM) Hislop College, Nagpur

Jun 2021

CERTIFICATIONS

▸ Python for Data Analysis	<i>Simplilearn</i>
▸ SQL — Beginner to Advanced	<i>Simplilearn</i>
▸ Full Stack Java Development	<i>Simplilearn</i>
▸ Introduction to Data Analytics	<i>Simplilearn</i>
▸ Google Analytics Certification	<i>Google Skillshop</i>

Available immediately for internship (hybrid/remote) · Open to full-time roles from June 2027
